Lindab **Roof Drainage System**

Lindab Rainline ™

A solution that is as right as rain

Lindab®

The colourful system

Lindab Rainline roof drainage system is available in twelve distinct colours. Mixing and matching these is easy. Either discreetly complementing the overall colour scheme of the house, or boldly creating accents of colour.

Why not choose dark red drainpipes for a white stucco facade? Or mount exclusive copper metallic pipes on a grey stone wall. Or why not mix tile-red gutters with white pipes to match the respective colours of roof and woodwork?

Any facelift is possible. The choice is yours.

Lindab Rainline in a nutshell

- durable and flexible
- a complete range of components
- easy to install
- snap-in fitting
- a variety of colours

New colours!

Graphite grey and Matt anthracite

The superior quality system

Lindab Rainline is the roof drainage system that offers the highest quality when it comes to combining durability, flexibility and ease of installation.

It has been developed by professionals for professionals. And, over time, it has become their top choice. Not least because Lindab Rainline's hard wearing properties ensure decades of performance without rusting or leaking.

Strong as steel
Steel is strong, versatile and durable, but it needs to be processed professionally. Lindab buys more than 200,000 tonnes of sheet steel every year (equivalent to what is needed to manufacture approximately half a million cars). So we know what we are doing.

Steel made to last
Steel is the ultimate material for roof drainage systems. It is lighter than cast iron, offers minimal thermal movement compared to plastic (which moves, cracks and leaks) and is inexpensive compared to cast aluminium.

Galvanized steel sheeting
To provide durable rust proofing the steel is coated with 275g zinc per m^2. The galvanized coating is naturally self-healing, any scratch or cut being automatically sealed by zinc ions, which wander to recoat the uncovered steel.

The smart system

Thanks to its smart design, Lindab Rainline has become the preferred roof drainage system for many tinsmiths. Its unique hand-in-glove fit and overall quality guarantee quick installation and high functionality for decades to come.

With gutters and downpipes in several dimensions and an extensive range of components, the system offers solutions for any type of building, large or small, classic or contemporary. In fact, once a Lindab Rainline system has been mounted, there will be no reason to replace it – unless you want to facelift your house with a new colour.

Superior snap-in fitting
Every component of the Lindab Rainline system has been designed and manufactured to the highest standards and smallest tolerances. The result is a system where every part snaps into the next to give a perfect fit.

Complies with existing standards
Lindab Rainline is the result of long experience gained by tinsmiths and craftsmen in numerous countries. It complies with existing European standards.

Good advice for architects and engineers
Along with the hardware components, Lindab Rainline offers an abundance of documentation, advice and software tools for installers as well as architects, engineers and consultants.

Solutions that enhance the overall result

Smart bracket
This bracket can be adjusted to match any roof pitch. Strong, yet extremely easy to fit.

Stop ends
These ends are self-sealing with an EPDM tube. They are fully reversible, i.e. same unit fits on both left and right end of a gutter. And they are easily mounted with just a single, firm knock.

Pipe holder
This holder is made from only one piece of sheet steel and mounts a pipe with one firm grip. There are no accessories to be lost or mounted askew.

Gutter joint
These joints are easy to fit, creating very firm, durable joints. The joints are guaranteed leak-proof with a long-lasting EPDM sealing.

Nozzle
This versatile nozzle has a one-grip, snap-on mounting that ensures a perfect fit to the semi-circular shape of the gutter. Can be mounted after the gutter is in place.

A complete range of components

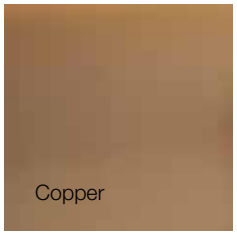
Many different colours

The Lindab Rainline system is available in twelve different colours. All are weatherproofed with extra durable paint, with an attractive, elegant finish.

Extra durable high-build polyester paint in twelve different colours.

In addition to our coated materials we also have aluminum-zink, copper and magestic.



Good Thinking

At Lindab, good thinking is a philosophy that guides us in everything we do. We have made it our mission to create a healthy indoor climate – and to simplify the construction of sustainable buildings. We do that by designing innovative products and solutions that are easy to use, as well as offering efficient availability and logistics. We are also working on ways to reduce our impact on our environment and climate. We do that by developing methods to produce our solutions using a minimum of energy and natural resources, and by reducing negative effects on the environment. We use steel in our products. It's one of few materials that can be recycled an infinite number of times without losing any of its properties. That means less carbon emissions in nature and less energy wasted.

We simplify construction
